# NewTechWood® Low Maintenance Commercial Furniture

Looks like timber. Performs without compromise.

## Furniture That Lasts Where Timber Fails

Australia is tough on commercial furniture. Timber fades, cracks and warps – leaving businesses with ongoing maintenance headaches and costly replacements.

NewTechWood® Commercial Furniture replaces timber tops and seats with fully capped WPC (Wood-Plastic Composite) and pairs them with powder-coated steel or aluminium frames. You get the natural look of timber with superior performance, lower lifetime costs and minimal maintenance.

## What is Wood Plastic Composite (WPC)?

A modern alternative to timber made from recycled wood fibres and plastics. It looks like timber – but performs much better. NewTechWood composite timber is built for harsh conditions and performs exceptionally in Australia.

### Fully-capped protection

- 360° capping shield resists rotting, fading, staining, swelling and splinters

### Ultra-low maintenance

- No oiling, sanding or repainting; just a quick clean

### Sustainable

- No trees are cut and no toxins are used during production or maintenance

### Weather-tough

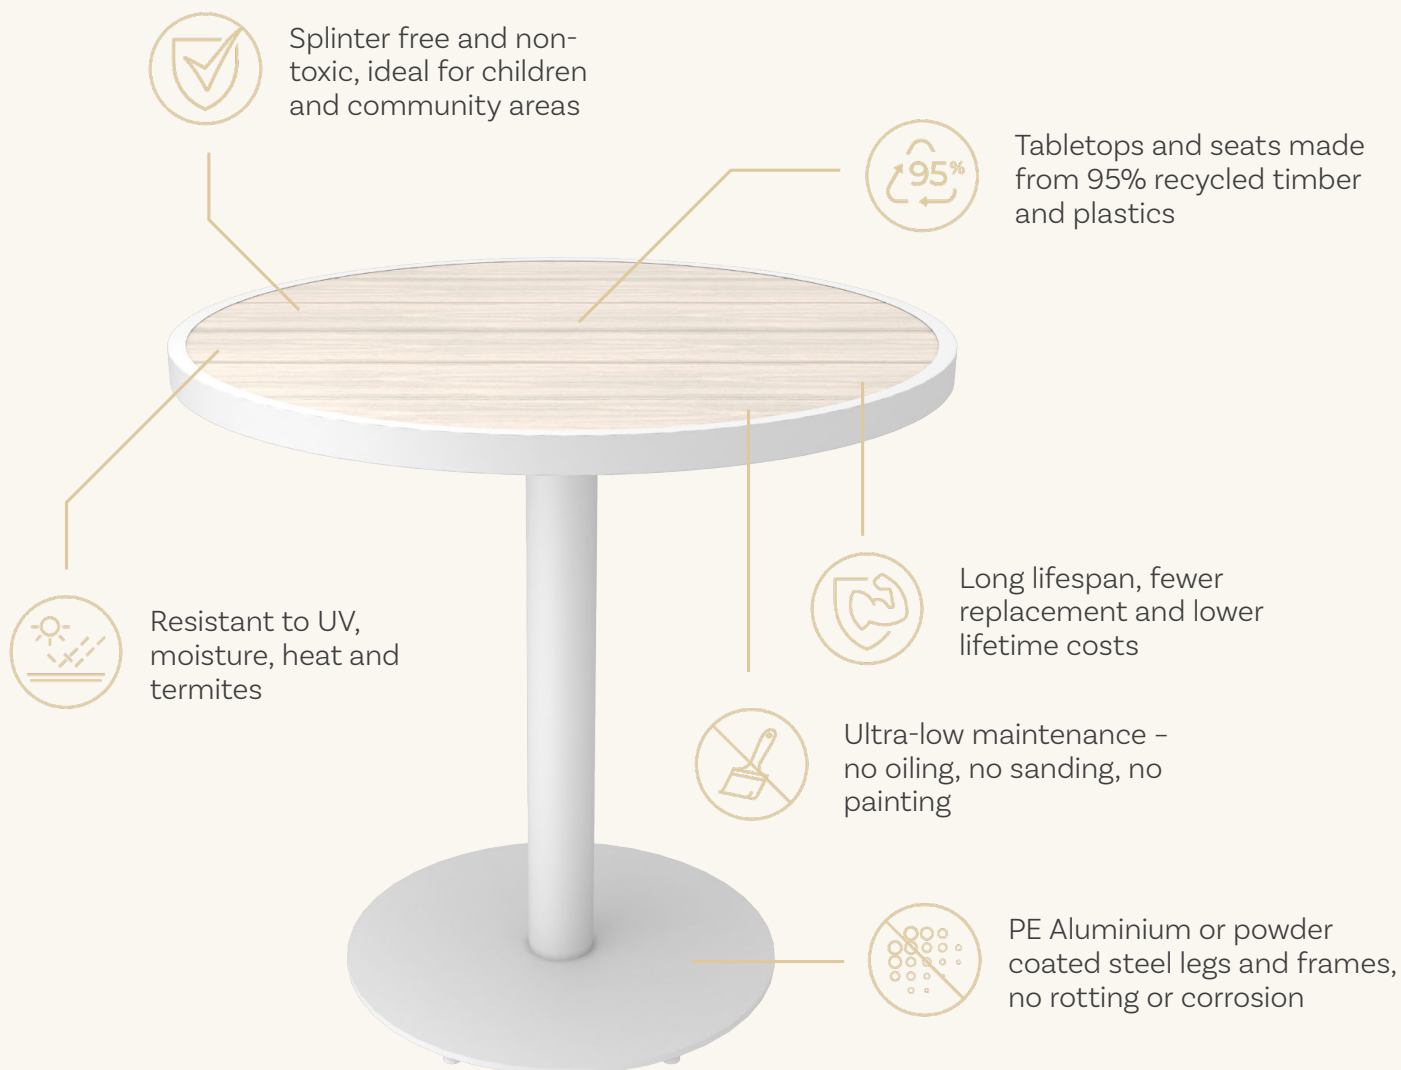

- Proven to perform in heat, rain and coastal environments

# NewTechWood® Commercial Furniture

## Composite where it counts. Metal where it matters.

WPC has the look and feel of natural timber, but it never needs oiling or painting, and it won't rot, splinter or attract termites. A quick wash-down is all it takes. With powder-coated steel or aluminium frames, our tables are built for high-traffic spaces and heavy use – delivering long service life with minimal upkeep.

From restaurants and bars to parks, schools, and mining camps, NewTechWood delivers long-lasting value with an eco-friendly edge.

# NewTechWood® More Than Furniture

NewTechWood® is Australia's go-to composite timber for decking, architectural cladding and privacy screening. The same fully-capped technology trusted by architects and builders now powers our Commercial Furniture range – delivering the warmth of timber with real-world durability and ultra-low maintenance.

## Tested by Australia

When you choose NewTechWood Commercial Furniture, you're choosing the same uncompromised quality, proven durability and low-maintenance performance as the NewTechWood Composite products.

Specified by councils, architects and builders across Australia since 2016, NewTechWood has become a leader in composite timber market, setting the benchmark for quality, durability, versatility and sustainability.

# Sustainability

## Minimise your carbon footprint and embrace a sustainable, eco-friendly choice with NewTechWood® composite timber.

We use timber and plastic waste to engineer products that look and feel like natural timber – without the negative environmental impact. No harsh chemicals are used nor required for maintenance, making NewTechWood an extremely eco-friendly product designed to last a lifetime.

Our efforts to reduce carbon footprints through innovative eco-friendly building materials, produced in a sustainable manner, are recognised by two leading green building credentials: Leadership in Energy and Environmental Design (LEED) and Environmental Product Declaration (EPD).

Every year, NewTechWood saves

**30** k  
tons

of plastic from being buried in landfills forever.

Every year, NewTechWood saves
